

Feed Selection Guide

All Primo Show Feeds are in meal form and contain:

- ** Clarify for prevention of the emergence of house flies, stable flies, and other manure breeding flies in the manure of treated pigs
- ** BMD (Bacitracin Methylene Disalicylate) for increased rate of weight gain and improved feed efficiency
- ** No withdrawal needed for all Primo Show Feeds

SHOW FEED	PROTEIN	FAT	LYSINE	FEEDING DIRECTIONS	Video Info
Primo 10	10.0%	5.5%	0.45%	Designed for dense muscled pigs to reduce round muscle and slow growth to stretch the show life of your pig. Will smoothen expressively muscled pigs, help square hind legs and relax front shoulders with undesirable angles. Feed after 120 lb	
14 Chub	14.0%	8.0%	0.75%	Add body, rib shape, flank and add a smoother finish. Chub is perfect to soften appearance of hard muscled pigs and for moderate growth. Ideal for breeding gilts for optimal growth and body appearance for that elite appearance. Feed after 80 lb.	
14 Glide	14.0%	4.0%	0.75%	Low fat and moderate protein to glide market and breeding pigs during their growth phase. Helps keep muscle square in naturally shaped pigs and maintains joint flexibility. Prevents excess condition in short fronted or bodied pigs. Feed after 75 lb.	
16 Developer	16.0%	5.0%	0.90%	Feed as a base feed to grow breeding and market pigs while moderately increasing muscle shape. If you want more condition and body blend with 14 Chub, or if you want more muscle and leanness blend with 18 Accelerator. Feed after 60 lb.	
18 Accelerator	18.0%	5.0%	1.05%	Feed as a base feed to grow breeding and market pigs while increasing muscle as they grow. If you want more condition and body blend with 14 Chub, if want less muscle blend with Developer, Glide or Primo 10. Feed after 45 lb.	
18 QuickStart	18.0%	6.5%	1.05%	Uniquely formulated for late nursery pigs to soften body and relax leg structure, for newly purchased pigs for muscle and body shape development and for growing pigs that need muscle shape and body condition until the final show. Feed after 45 lb.	
20 Peeler	20.0%	4.0%	1.30%	Clean jowls/necks and other excess condition while giving "pop" to top shape. Uniquely designed to give extra showing presence. Feed as sole diet or blend with 18 Accelerator or 16 Developer to moderate full "Peeling". Feed after 60 lb.	
22 Stealth	22.0%	7.0%	1.50%	Modern, uniquely formulated push product. Designed to create a rapid muscle shape, body mass and keep the elite show ring presence needed to get to the backdrop. Feed as sole ration or blended with 18 Accelerator or 14 Chub.	

Feed Selection Guide

STARTER FEED	PROTEIN	FAT	LYSINE	FORM	FEEDING DIRECTIONS	Video info
Express Wean MD *42-day withdrawal Express Wean *No antibiotic	20.5%	6.5%	1.50%	Pellet	Express Wean MD contains 50 g/ton Mecadox (42-day withdrawal) for enteric (gut) pathogens and contains Clarify. Use as a creep feed and for weaned pigs from 4 to 6 weeks post-weaning to develop muscle and body mass. Formulated with high amino acid levels and moderate protein to reduce loose stools. Transition or blend with 20 Max MD during mid to late nursery depending on body type needs.	
20 Max MD *42-day withdrawal 20 Max *No antibiotic	20.0%	7.0%	1.30%	Meal	20 Max MD contains 50 g/ton Mecadox (42-day withdrawal) for enteric (gut) pathogens and contains Clarify. Aids in the development of muscle and body mass, while allowing for ideal structural development in mid to late nursery. Fits best for nursery pigs, in the chip barn prior to sales, or as receiving feed for your new pigs. 20 Max (no withdrawal) can be used as a push product for jackpots or the final show.	

SOW FEED	PROTEIN	LYSINE	FORM	FEEDING DIRECTIONS	Video info
Gestation	13.0%	0.60%	Meal	Gestation feed developed with the show pig mom in mind. Targeted nutrition to ensure high performance during breeding and gestation. Contains ingredients to increase total born, reduce non-viable pigs at birth and feed preservation additive.	
Gestation Cube	13.0%	0.60%	Cube	Gestation feed in cube form for the convenience of feeding developing gilts and gestation females to help minimize wastage. Contains ingredients to increase total born, reduce non-viable pigs at birth and feed preservation additive.	
Lactation	15.5%	0.93%	Meal	Lactation feed developed for nutritional needs of first litter gilts and sows to maintain body condition and produce high quality milk. Contains added fat for increased essential fatty acids to help improve reproduction for future litters.	
Sow Base Mix	11.5%	3.70%	Meal	Primo Sow Base Mix is designed for producers that grind their own feed on-farm or in a local feed mill. Use 100 lb/ton in both gestation and lactation sow feed. Visit primofeeds.com for proper use.
